Learn the latest on prescribing controlled substances through Smart Rx.

More Ohioans have died in recent years from prescription drug overdoses than car accidents.

Drug overdoses in Ohio claimed the lives of 5,115 Ohioans in 2017.

Nearly 2,000 health care professionals have completed Smart Rx and earned continuing education credits since 2015.

So what can you do?

Learn the latest on prescribing controlled substances through Smart Rx.

Earn CME credits for participating in the Educating Ohio’s Prescribers-Smart RX program.

Smart Rx consists of four 15-minute interactive modules that are accessible from your computer, smartphone or tablet and are available any time.

(Insert organization’s name here) is committed to you as a provider and an employee. Please take 60 minutes to protect yourself and your patients.

The Educating Ohio’s Prescribers-Smart RX program is provided through the support of the Coverys Community Healthcare Foundation.
